

# **XP-Values**

## **1. Devangi Doshi – Courage**

Devangi had this XP fundamental value. Devangi, as an individual, has the capacity to provide us with the truth in every scenario. She aided us in resolving each issue realistically, considering all potential outcomes. On our behalf, she took the initiative to begin learning all of the new technologies necessary to complete this job.

## **2. Radhika Vyas – Communication**

Throughout the project, Radhika aided in the implementation of this XP core principle. She had the task of directing the team's entire activities. This fundamental principle aided us throughout the project by ensuring that we were all capable of meeting the project's criteria. Additionally, it enabled us to keep track of our progress after each sprint.

## **3. Urja Naik – Feedback**

Urja was a firm believer in this XP core concept. So that we could go back and forth between sprints and make incremental changes with each sprint, she provided frequent feedback between them. She has taken the initiative to limit the amount of time spent on each activity that is reliant on another one. She also assigned a priority to the chores that needed to be completed.

## **4. Vaibhav Jajodia – Simplicity**

Vaibhav adhered to the XP core principle of simplicity. Throughout the project's duration, he was responsible for ensuring that the process workflow was maintained. He worked on the front-end of the airline reservation system and also assisted with the back-end of the project. Throughout the project, he provided perfect openness, honesty, and ultimate dependability.
